

ACTIVITY GRASS RANGE

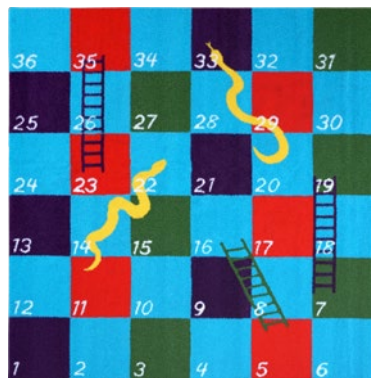

Made from highly resilient 18mm pile grass, Aloro's activity grass features are a fun and popular addition to synthetic grass play surfaces. Constructed as a single piece mat with no glued joins, they are hardwearing and perfect for schools, playgrounds and childcare facilities.

CUSTOMISE YOUR PLAY SPACE WITH A FIRST NATIONS DESIGN

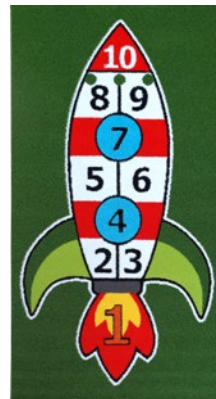

First Nations themed features are an increasingly popular way to add cultural value to school play spaces. It is possible to enhance most of our activity grasses with a fully customised design that includes indigenous patterns!
