MATERIAL	PE Foam (closed cell)
DRAINAGE	Vertical and Horizontal, >3000 mm/h
DENSITY	120kg/m³
CRITICAL FALL HEIGHT	1.2m*

WHY CHOOSE REFOSPORT SHOCK PAD TILES?

Shock pad underlay provides an additional protective and impact-absorbing layer installed directly underneath synthetic grass surfaces. Constructed from closed cell foam, Aloro Shock Pad underlay provides fall protection, facilitates drainage and is specially developed to stand up to rigorous use in sporting field applications.

PRODUCT FEATURES

- **Easy to install:** Interlocking tile system for a quick, secure fit
- **High density:** Closed cell PE foam made to stand up to rigorous use
- **Excellent drainage:** Drains vertically and horizontally at over 3000 mm/h
- **Fall protection:** Critical fall height of 1.2m*
- **Eco-friendly:** Made from foam excess that is prevented from entering landfill
- **Ideal for sport:** High density suits sporting fields

*Actual test onsite is required to certify the CFH
