

# BOUNCE EPDM RUBBER GRANULES

Bounce EPDM (Ethylene Propylene Diene Monomer) Rubber Granules: Known for its exceptional weather resistance, Bounce EPDM rubber is a popular choice for outdoor applications, especially in surfaces exposed to sunlight and varying weather conditions. Its durability and color stability make it ideal for wetpour applications in playgrounds and recreational areas, providing both performance and longevity in outdoor settings.

<b>GRANULE SHAPE</b>	Cubical
<b>SPECIFIC GRAVITY</b>	1.65 g/cm <sup>3</sup> (±0.05)
<b>HARDNESS SHORE A</b>	65° A (±5)
<b>TENSILE STRENGTH</b>	>4.0 Mpa
<b>ELONGATION AT BREAK</b>	>400%
<b>BULK DENSITY</b>	750 - 800 gr/l
<b>PARTICLE SIZE</b>	1.0 - 4.0 mm
<b>TYPICAL PARTICLE SIZE DISTRIBUTION</b>	3.36 - 4.0 mm: 1-6% 2.8 - 3.36 mm: 30-50% 2.0 - 2.8 mm: 40-60% 1.68 - 2.0 mm: 10-20% 1.0 - 1.68 mm: 2-10%

Note: These colour swatches serve as an approximation only. Actual rubber colour may vary due to differences between screen or print colour as shown, and the true colour of the product.
