

# BOUNCE PSBR RUBBER GRANULES

Bounce PSBR (Precoat Styrene Butadiene Rubber) Rubber Granules: Made from recycled rubber, Bounce SBR granules are a sustainable and cost-effective option for wetpour surfaces. They offer solid performance and resilience, making them suitable for applications such as playgrounds and sports surfaces. Bounce SBR granules are often chosen for projects that balance durability with environmental responsibility, and they can be coated in various colours to enhance the appearance of the finished surface.

<b>GRANULE SHAPE</b>	Cubical
<b>BULK DENSITY</b>	580-700 g/litre
<b>TENSILE STRENGTH</b>	>5.0 Mpa
<b>ELONGATION AT BREAK</b>	>500%
<b>300% MODULES</b>	12-18 Mpa
<b>HARDNESS</b>	50-70 IRHD
<b>REBOUND RESILIENCE</b>	60-70% @ 50°C

Note: These colour swatches serve as an approximation only. Actual rubber colour may vary due to differences between screen or print colour as shown, and the true colour of the product.
