

TECHNICAL DATA SHEET

BOUNCE™ PLAY EPDM TURTLE

General Description

Bounce™ Play EPDM Turtle is a soft, impact-absorbing playground element designed for children's play areas. Its ergonomic form supports climbing, sitting, and interactive play while ensuring a high level of safety.

This product is designed in accordance with EN 1176 playground equipment safety principles, while surface safety performance is supported by materials tested under EN 1177.

Material Composition

- Outer Layer: Bounce EPDM granules
- Binder: PU binder
- Inner Core: SBR granules

Material Quality & Testing

All EPDM granules and PU binders used in this product are manufactured under the Bounce brand and tested according to international standards.

Material-related tests include:

- FIFA Test Method 2024-11 (UV ageing & colour fastness)
- FIFA Test Method 2024-16 (Thermogravimetric analysis – rubber content verification)
- EN ISO 4892-3 (UV resistance)
- PAH content compliance (EU safety regulations)
- EN 1177 (Impact attenuation)
- EN 71-3 (Migration of elements – child safety)

Safety Requirements

- **Critical Fall Height (CFH):** Max. 100 cm
- **Safety Area:** Minimum 150 cm clearance required around the product.
- **Installation Surface:** Impact-absorbing surface recommended (EPDM, rubber, or equivalent).
- **Free Space:** No obstacles should be placed within the defined safety zone.

Installation

- Can be fixed to ground using steel rod anchoring system.
- Suitable for installation on EPDM, rubber, concrete, or compacted base.
- Professional installation recommended.

Maintenance

- Easy to clean with water
- No special maintenance required
- Resistant to wear, weather, and UV exposure

Surface Properties

- Soft and elastic structure
- Impact-absorbing
- Non-toxic and child-safe
- UV-resistant and weather-resistant
- Anti-slip surface

Height	75 cm
Width	165 cm
Length	220 cm
Weight	130 kg
